

FORPROMT

Teleprompter Software

Fortinge is proud to present 'ForPrompt Studio' and 'ForPrompt Studio News', our full-scale teleprompting software applications.

We designed it for live broadcasting environments, and it can be used in every level of broadcasting studio. Plus Forprompt Studio News is compatible with all major newsroom systems via MOS protocol.

The very new design prompter software has multi-language support, updates in real-time, rich text-file support and many more features. It is a comprehensive, invaluable solution for challenging live broadcasts.
